

BEJOLA

Serving People and Animals

Fine Spraying Systems for Stables

Healthy Stable Climate.
Healthy Animals.

In focus all year round

Not only in summer – all year round the Bejola Fine Spraying Systems bring many benefits into your stable. User-friendly and environmentally friendly with minimal water consumption.

- ⚙️ **Temperature reduction** by up to 9°Celsius (48°F)
- ⚙️ **Enhancement of well-being and performance** for both humans and animals, prevention of stress caused by heat.
- ⚙️ **Dust and pollen binding** – fresh and clean air in stable and open stable throughout the year.
- ⚙️ **Optimisation of moisture**
The German Federal Ministry of Food, Agriculture and Consumer Protection (Bundesministerium für Ernährung, Landwirtschaft und Verbraucherschutz (BMEL)) recommends an optimal humidity level of 60 – 80% for horse stables. Veterinarians therefore recommend monitoring and, if necessary, adjusting humidity in the stable using humidifiers or dehumidifiers.

Your Bejola Fine Spraying System takes care of that for you!

In focus all year round.

„Since we have installed the Bejola Spraying System, our stable is the favourite place for us to be.“

Christina Gierlich
Training Stable Sportpferde Gierlich

- ❁ State-of-the-art, app-controlled technology and finest nebulisation ensure coolness and freshness – keeping humans, animals and bedding dry.

- ❁ Optional addition of various products from the Bejola **air** product range:
 - Improvement of your stable air
 - Supports the treatment and prevention of respiratory diseases
 - Prevention against bacteria, viruses and more
 - Insect repellent and prevention of sweet itch and diseases such as bluetongue

 **BEJOLA air**[©]

With our experienced partner, we have developed the Bejola **air** product range that makes the use of a Bejola Fine Spraying System even more attractive. The products can be dosed into the fine water mist on demand and at times specified by you, offering various effects.

 **BEJOLA air EasyBreath®**

Enriches the fine water spraying mist with high-quality, natural oils relieving the lungs and bronchial tubes of our animals. In case of acute or chronic respiratory diseases, Bejola **air** EasyBreath® can support the regeneration of the respiratory passages and alleviate coughing. Additionally, the air in your stable is wonderfully fresh and gently scented. A delight – not only for animals with asthma or allergies.

 **BEJOLA air Protect®**

Based on oregano. Oregano is one of the most powerful natural antioxidants and its antimicrobial effect makes it one of the best natural antibiotics. In addition to antibacterial properties, Oregano is also attributed with fungicidal, anti-parasitic and many other effects which can help to keep your stable clean and protected.

 **BEJOLA air FlyGuard®**

With its high-quality essential oils, Bejola **air** FlyGuard® keeps mosquitoes, flies, and other flying insects at bay while spreading a fresh scent that is perceived as very pleasant by both humans and animals. The quality of time spent in your stable is significantly improved.

In this context, we pay special attention to a mosquito of the *Culicoides* genus, the carrier of **Bluetongue disease** in ruminants and trigger of **sweet itch**. With its essential oils, Bejola **air** FlyGuard® also repels this genus, thus supporting you in the preventive protection of your animals from diseases.

„We don't use products for our animals that lack a sound scientific basis. That's why we use Bejola air®.“

Peter Hinz – Cattle breeder

“The Bejola Spraying System works great and Bejola **air** FlyGuard® is a huge relief: We have hardly any flies or mosquitoes in our stable.”

Henry Rademaker – Alpaca breeder

It goes without saying that we use only the highest quality ingredients for all Bejola **air** products. Pure essential oils and plant extracts that inherently provide the ideal combination to support animal health.

Pure oils are the highest-quality oils as they are directly extracted from the parent plant or a plant part. All ingredients and their natural ratios are thus preserved. They are all specified and standardised to ensure effectiveness and safety as well as consistent efficiency and reliability.

Bejola Spraying System with one dosing unit. For maximum comfort, up to three dosing units are possible.

Henry is glad that his Bejola Fine Spraying System not only creates a great indoor climate for his Vechtetal-Alpakas but also contributes to the prevention of the dreaded Bluetongue disease.

Henry Rademaker from Vechtetal-Alpakas:
„I deliberately chose a Bejola Fine Spraying System as it brings significant advantages all year round. “

Convenient Control and Monitoring via App

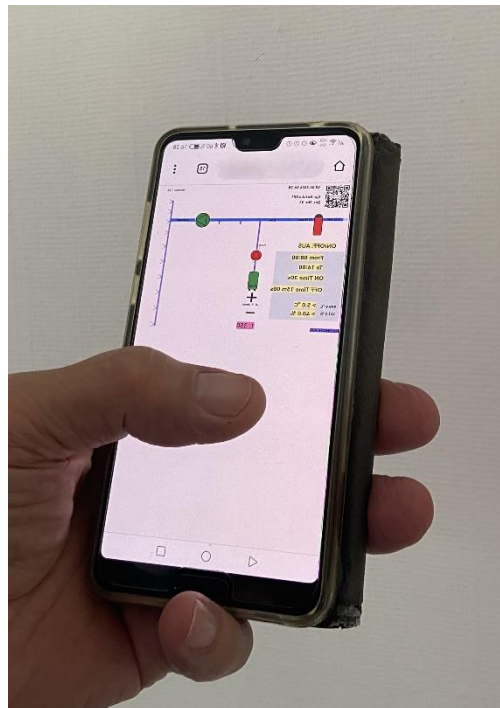

State of the art technology – conveniently controlled via app – makes the Bejola effects possible and brings a freshness into your stable that simply feels good - even in extreme heat and dryness.

The system automatically regulates the humidity in your stable according to your preferences, ensuring optimal conditions for your animals.

The Bejola Spraying System enhances performance and well-being of both humans and animals."

We'll take care of setting up the app for you – easily via remote maintenance.

We will also configure the desired settings for you.

Example of an installation

Not only horses appreciate the freshness of Bejola

The Bejola Fine Spraying Systems can be used in many different places and for a variety of events.

- 🌸 City Cooling
- 🌸 Sports facilities

(pigs, cattle, alpacas, ostriches,
chicken and many more)

In focus all year round.

The climate that awaits us will be very, very different from the climate we grew up in.

Carlo Buentempo, Direktor Copernicus
Klimabericht April 2023

What our customers ask us:

From what stable size onwards can you recommend a Bejola Fine Spraying System?

Your stable size is perfect for a Bejola System in any case! Tell us the dimensions of your stable(s), the number and size of the boxes - the details you have at hand - and we will provide you with an offer perfectly tailored to your requirements.

Even better and easier for you: Send us a simple mobile phone video of your stable, preferably with verbal comments, preferably to our WhatsApp address.
(all contact options: last page).

What is the water consumption of the Bejola Fine Spraying System?

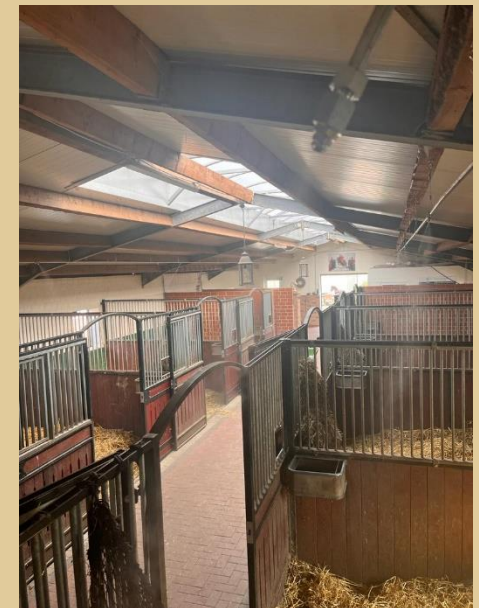

Water consumption is extremely low, the system works in an environmentally friendly and comfortable way.

Is the water available at my stable suitable for operating the Bejola Fine Spraying System?

Our spraying systems need water with drinking-water quality.

Is the ceiling height in my stable suitable to install a Bejola Fine Spraying System?

Definitely. With the Bejola piping and suspension system, we have developed a modular design that offers an individual and infinitely flexible solution for every ceiling. Cleverly thought out and easy to install. We will be happy to advise you.

How often do I have to switch on the system?

You don't have to schedule any of your time for this – the Bejola system is automatically controlled according to your requirements. You want to be reassured nevertheless? No problem: For your peace of mind you have overview and control anywhere and at any time via app.

How much maintenance is necessary?

The Bejola Fine Spraying System is extremely low maintenance. You can easily carry out the necessary maintenance works yourself. We are also happy, however, to offer you a maintenance contract so that your time remains free for the things that are important to you. We will be happy to advise you.

What do I do when it's freezing cold?

In very cold temperatures, it may be necessary to switch off the equipment for a while and drain it. Draining is carried out via app and does not bring any workload for you.

Get your free offer now!

And have you thought about financing or leasing?

Are you considering installing or expanding a Bejola Fine Spraying System in your stable but currently lack the financial means or prefer not to use your own capital to maintain liquidity?

At Bejola we understand that acquiring equipment can pose a financial challenge. Therefore, in collaboration with our competent and experienced partner Rodieck Consulting, we have created an **attractive financing option**.

If required by you, we establish the contact in a straightforward manner.

You can plan without worries, we support you in realising your project!

For **getting a free offer** contact us choosing your favourite medium shown on this side or schedule an appointment at Bejola.de

Even easier for you: Send a simple mobile phone video of your stable, preferably with verbal comments, to our WhatsApp address. We will check and come back to you.

We look forward to serving you!
